

## (BKROL) Light round Bale clamp

A round bale grabber for use with mini shovels and light tractors.

Due to the shape of the clamping brackets suitable for bales of different sizes.

Because the cylinders are positioned on the outside, the result is a minimum force and wear at the pivot point.

The machine is built in a very compact design, so the weight is close to the vehicle, which promotes lifting capacity.

Clamping brackets 5mm thickness.

Due to the slotted hole, it is easy to grab a bale.

Price with hoses and 'male' connection, without attachment parts.
